Find Useful Information On Our Video Page
By GRTI Marketing

We've added a video page to our website as another way to provide information to our customers.

Our website now features a videos page where you can view information on GRTI programs and events. Our current material provides information about GRTI’s Fiber To The Home Campaign. We will regularly post new information to help keep our customers in the know!

We also share video content on our social media pages. Be sure to follow us on Facebook, Twitter, Instagram, and Vimeo @gilarivertelco. Visit www.gilarivertel.com/content/grti-videos.

Two GRIC Students Selected To Go To Washington D.C.

By Duncan Wiston

Davidson Manygoats and Karissa Mark attended the FRS Youth Tour in Washington D.C.

We invited Davidson Manygoats and Karissa Mark to visit GRTI to meet our Board of Directors and tour the GRTI facility before their trip to Washington D.C. These students were selected to represent GRTI in D.C. after submitting an essay, biography and 2 references to GRTI.

Davidson is a student at Seton Catholic Preparatory School and is looking to pursue a degree in engineering after high school. He plans to attend Central Arizona College after high school and later transfer to Arizona State University.

Karissa is a Student at Imagine Prep in Coolidge and plans to study Engineering or Medicine after high school. She plans to attend a community college followed by Stanford or Bothell University.

After meeting with the GRTI Board of Directors, Davidson, Karissa, and their mothers toured the GRTI facility and learned how we provide phone and Internet service to the community.

During their trip to D.C., the students will meet youth from rural areas across the country to develop an understanding of the government’s role in telecommunications. They will also visit historic sites and study the legislative and governmental process.

Quick Tips

To keep your service running smoothly, an occasional visit to your home may be required. To help us get the job quickly and efficiently, we suggest:

Keep the area around your hardware clean and clear of clutter

If a visit to your home for maintenance or troubleshooting is necessary, please keep the area around your modem, GigaCenter, Phone, or AlertOne Unit clear of clutter and debris. This will make it easier for our
GigaCenter Raffle Winner

By GRTI Marketing Staff

The first winner of our GigaCenter raffle received a Smart TV.

Sandra Smiley of Blackwater was the recipient of a 32 inch Samsung Smart TV from GRTI! Sandra entered our raffle by keeping her initial GigaCenter installation appointment with us. Sandra’s home is now equipped and ready to enjoy the benefits of fiber optics!

GRTI will be having a GigaCenter raffle at the end of each month. Customers who keep their initial GigaCenter installation appointments will be entered for other great prizes!

Did you Know? The first ever VCR, which was made in 1956, was the size of a piano!

Keep your GigaCenter installation appointment

We are currently installing GigaCenters in homes throughout Gila River. When scheduled for a GigaCenter appointment, it is important to keep it. Keeping your appointment will help us reach our goal of installing fiber to every home in Gila River by 2019. Plus, if you do not reschedule or cancel, you will be entered in the GRTI monthly raffle to win great prizes!

Glossary Corner

**App**
An application, especially as downloaded by a user to a mobile device. Apps can also be downloaded to tablets, laptops, and Smart TV's.

**Download**
To copy (data) from one computer system to another, typically over the Internet.

**Fiber Optics**
The use of thin flexible fibers of glass or other transparent solids to transmit light signals, chiefly for telecommunications.

**GigaCenter**
A device that enables GRTI to deliver gigabit data, IP video and carrier grade voice services with the coverage, performance and availability needed to deliver an experience like no other.

**Smart TV**
A television that is, essentially, an Internet-connected, device specialized for entertainment, such as video streaming.

**Stream**
To transmit or receive (data, especially video and audio material) over the Internet as a steady, continuous flow.

technicians to access your equipment and get the job done.
Keeping the surrounding area clean will also prevent insects from inhabiting your devices and possibly causing damage.
